

Clamshells

Clamshells are hinged, thermoformed packages that contain top and bottom sections that open like a clam. Each clamshell comes with a snap-lock feature that allows the consumer to open and close the package without damaging the product. At

Blackbourn we can customize our clamshells to fit the size and shape of your product, allowing us to

meet your company demands with the most secure and reliable package for your product.

We offer 52 clamshell design options – in stock and ready to use – see if one is right for you!

Component Process Trays

Thermoformed clamshells, and one or two piece trays can be designed for components or work in process trays. Thermoforming molds can be designed to hold a wide variety of parts for your given application. Let our engineers at Blackbourn Packaging Solutions analyze your needs and come up with a solution.
